

Tinifier Quick Start

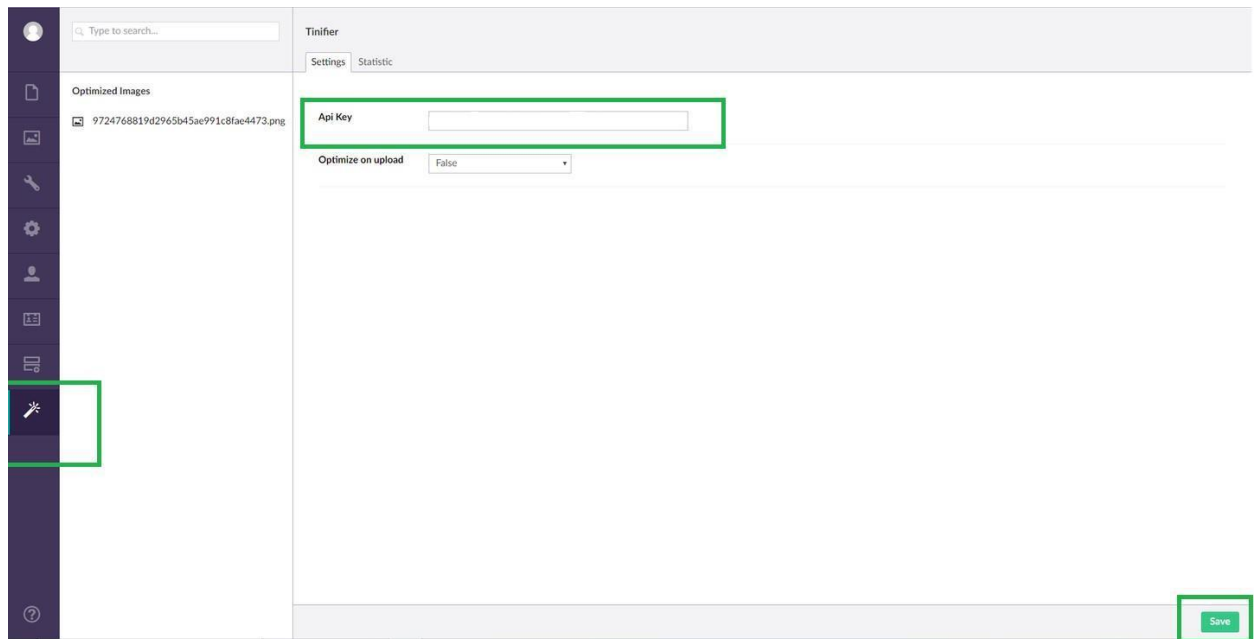

1. Install Tinifier package

2. Register account in the [TinyPNG](https://tinypng.com) and get API key

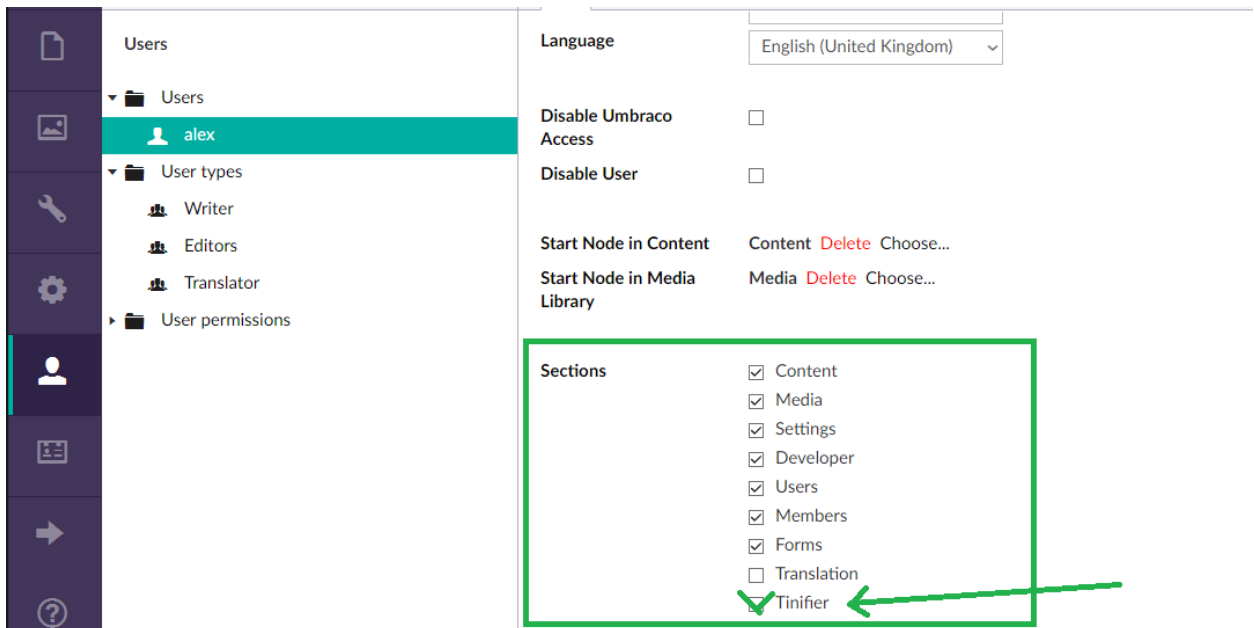

3. Go to the Tinifier settings and set API key

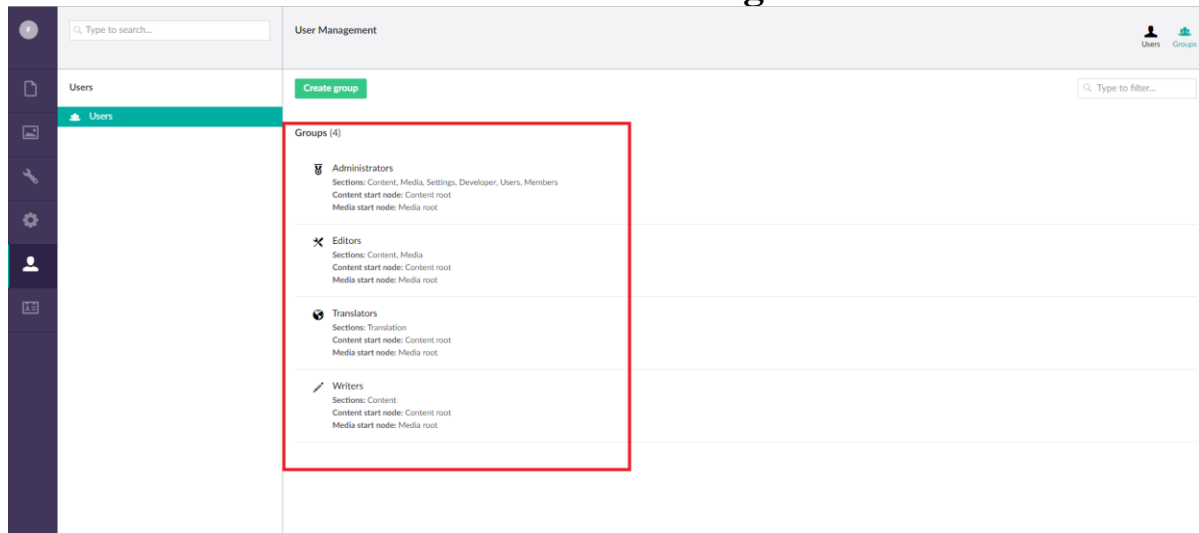

(For version Tinifier 1.2 and higher)

3.1 Add Tinifier section to your user in Users section

Umbraco 7.6 and lower

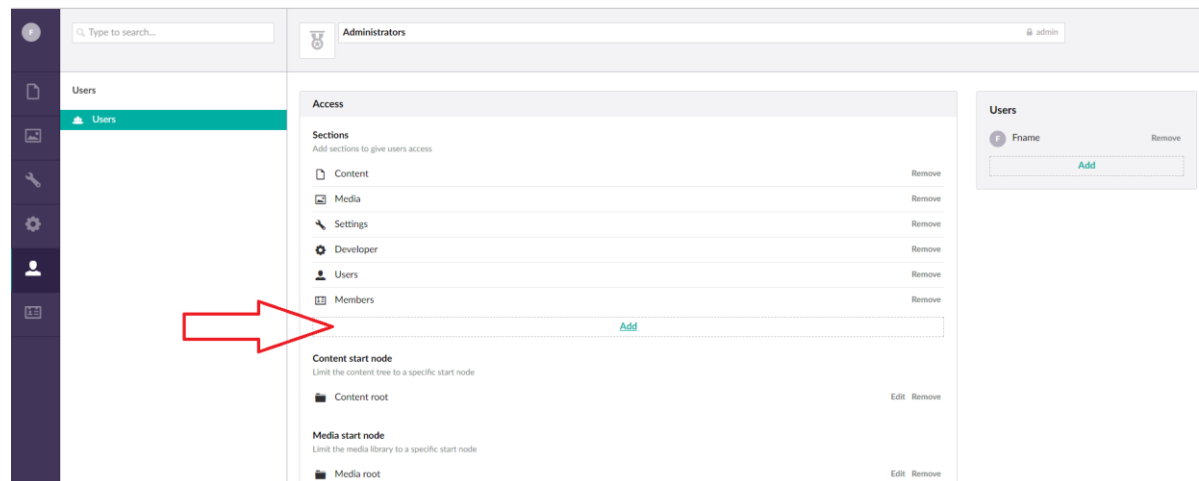

Umbraco 7.7 and higher

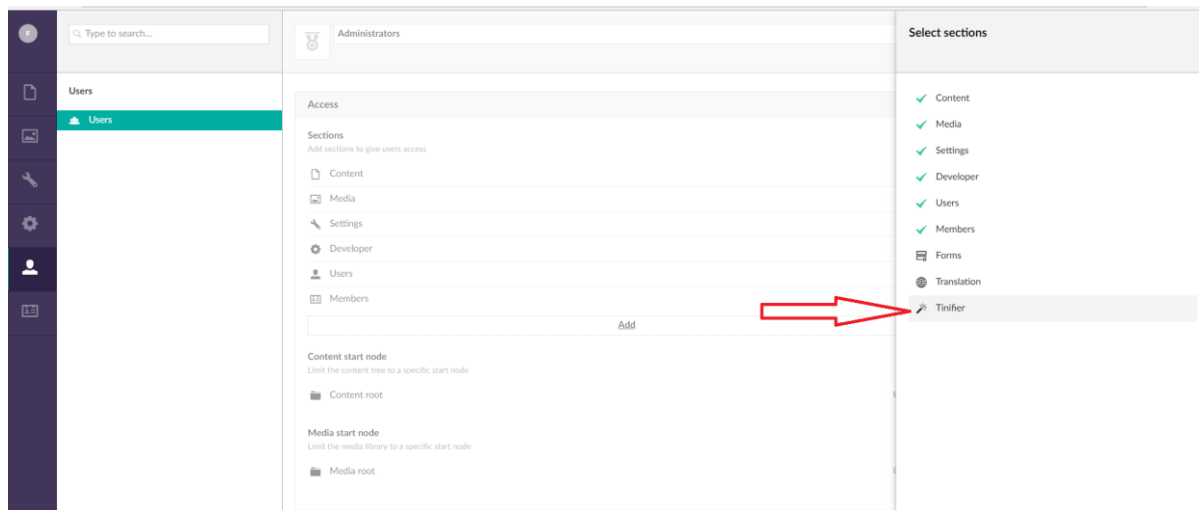

The screenshot shows the 'User Management' interface in Umbraco. On the left, a sidebar contains icons for Users, Groups, and other settings. The main area is titled 'User Management' and has a 'Create group' button. Below this, there is a search bar and a list of groups. A red box highlights the 'Groups (4)' section, which contains four groups: Administrators, Editors, Translators, and Writers. Each group lists its sections, content start node, and media start node.

Group	Sections	Content start node	Media start node
Administrators	Content, Media, Settings, Developer, Users, Members	Content root	Media root
Editors	Content, Media	Content root	Media root
Translators	Translation	Content root	Media root
Writers	Content	Content root	Media root

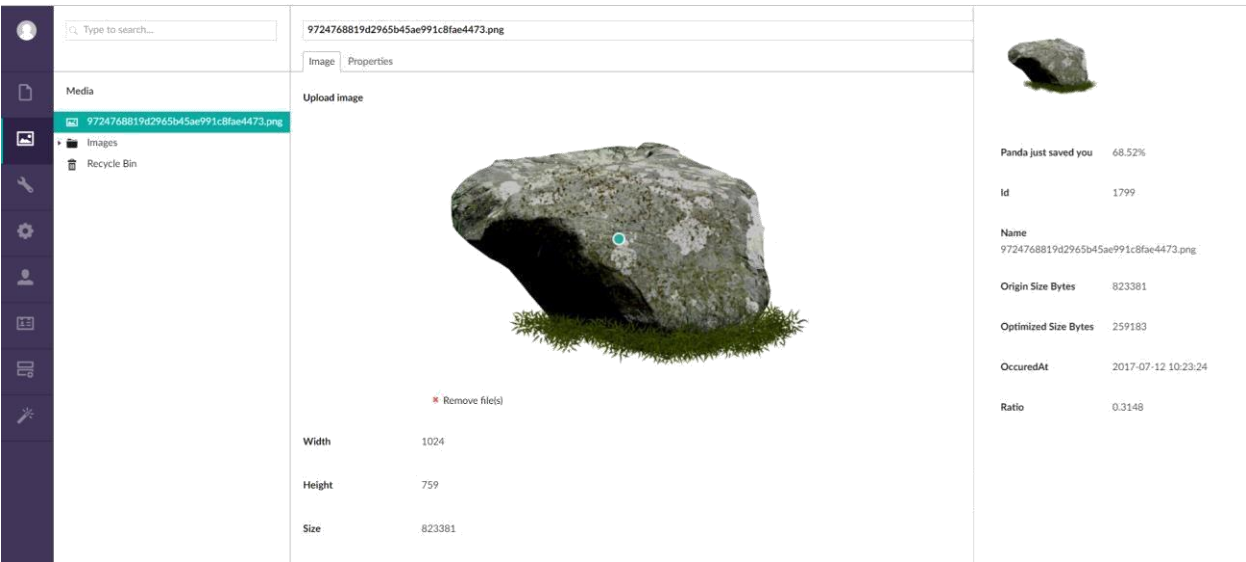

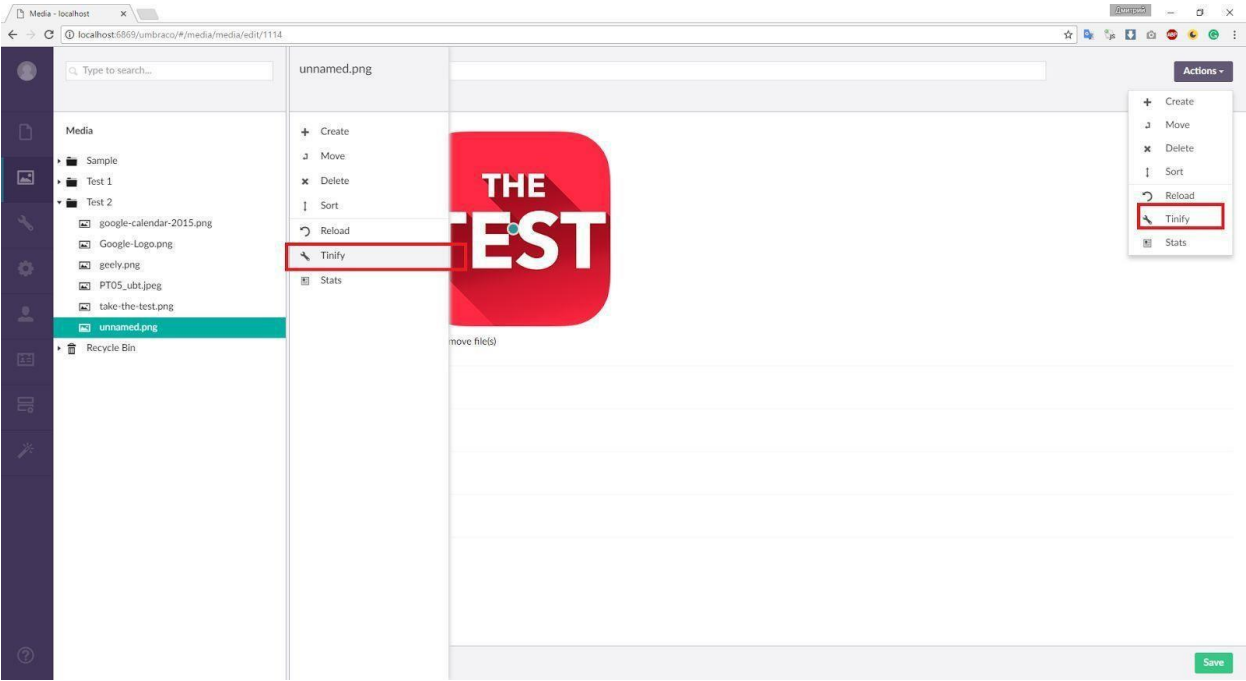

The screenshot shows the 'Access' settings for the 'Administrators' group. A red arrow points to the 'Members' section, which has an 'Add' button. The 'Access' section lists various sections with 'Remove' buttons: Content, Media, Settings, Developer, Users, and Members. Below this, there are options for 'Content start node' and 'Media start node', each with an 'Edit' and 'Remove' button. On the right, there is a 'Users' section with a 'Fname' field and an 'Add' button.

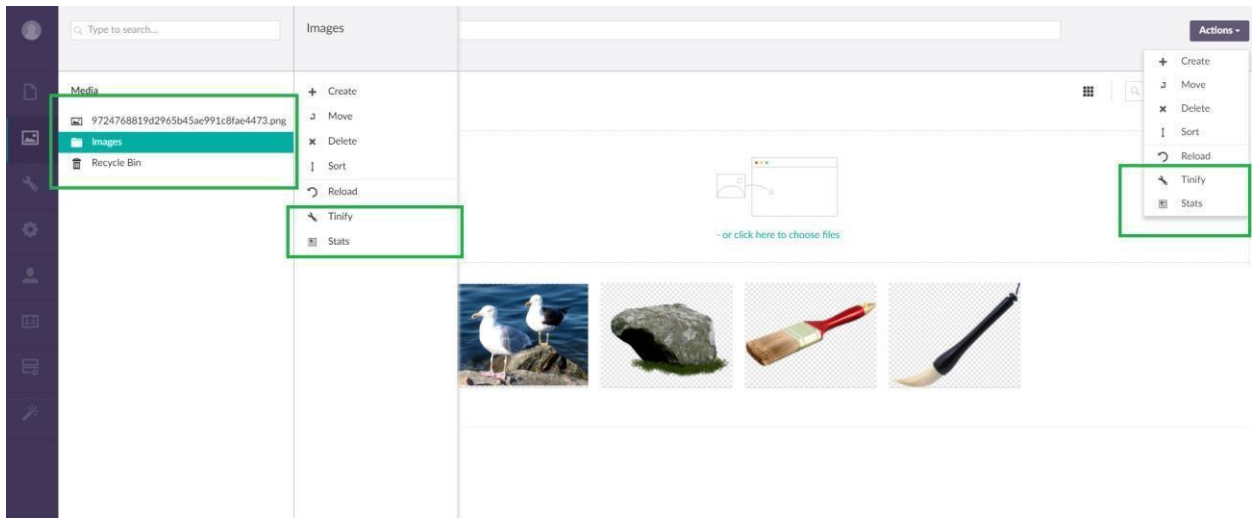

The screenshot shows the 'Select sections' panel for the 'Administrators' group. A red arrow points to the 'Tinfier' section, which is currently selected. The 'Select sections' panel lists various sections with checkboxes: Content, Media, Settings, Developer, Users, Members, Forms, Translation, and Tinfier. The 'Access' section on the left lists various sections with 'Remove' buttons: Content, Media, Settings, Developer, Users, and Members. Below this, there are options for 'Content start node' and 'Media start node', each with an 'Edit' and 'Remove' button.

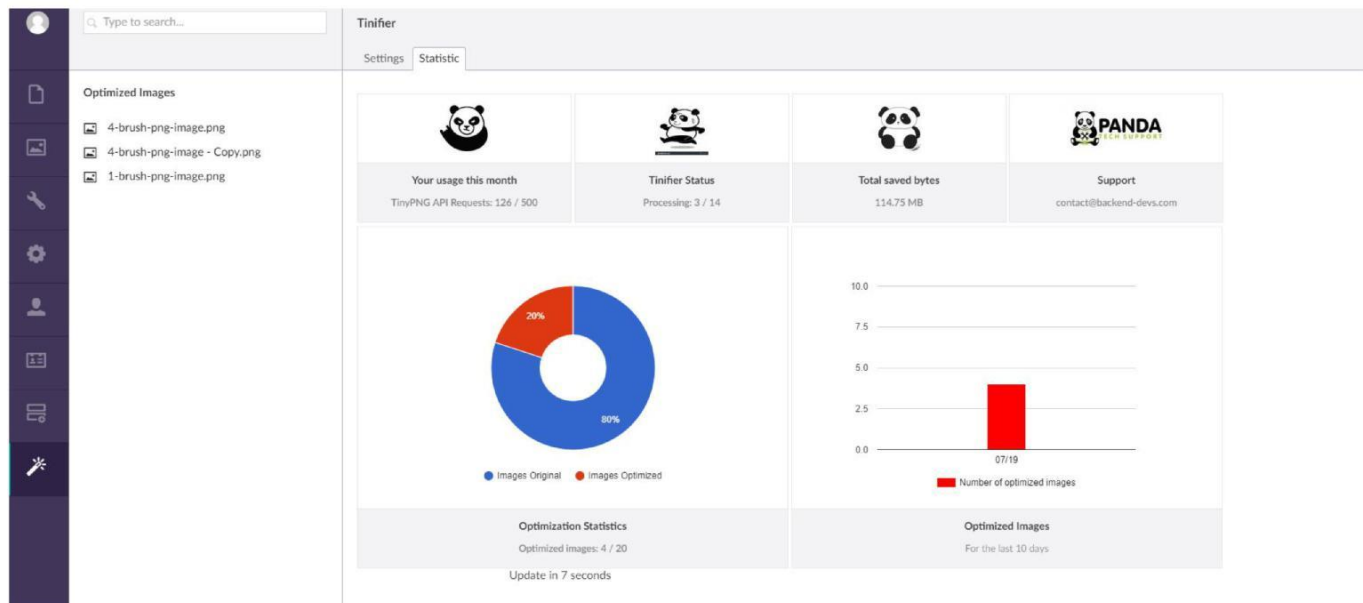

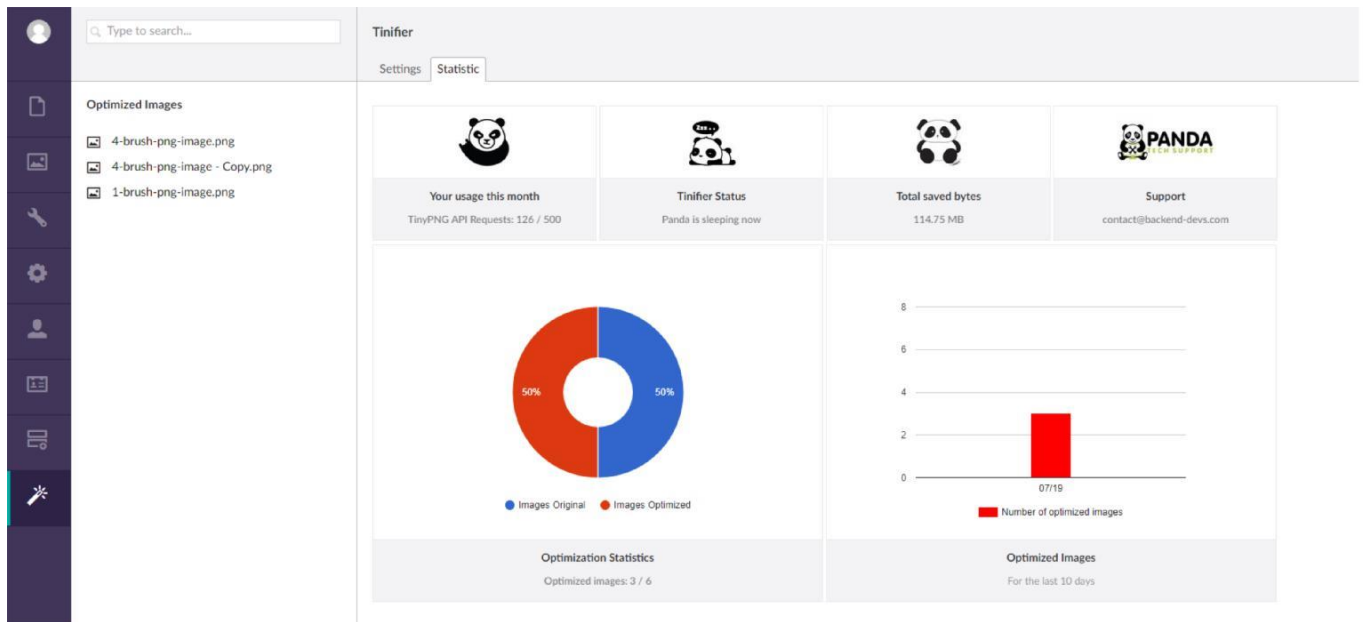

4. Tinify (compress) an appropriate image

5. Or you can tinify full folder with images

6. You can find tinifying statistic in Tinifier section (“Statistic”)

7. Your visitors are happy with fast loading pages!
